

Workers' CompXPress

Enhance Business Efficiency

Insurity understands the complexities of workers' compensation insurance and how they can bog down clients' operations. To address both challenges, we created Workers' CompXPress, an innovative policy and billing system that simplifies workers' comp policy administration by allowing clients to manage the entire lifecycle of a policy, from application or quote all the way through renewal.

Modernize Your Workers' Compensation Solution

Workers' CompXPress is rich with features that make workers' comp policy administration easy and keep clients' teams productive. The features include:

Multi-state rating engine. The system facilitates rating across different states, rate tiers and rating algorithms

Application processing and quoting. Workers' CompXPress supports multi-state and multi-location entries and can produce multiple quotes per application based on different workers' compensation plans

Policy form generation. The system's built-in logic populates policy forms and endorsements and can automatically generate and print forms, individually and in batches

Rules-based policy management. Administration of multi-state and multi-location workers' comp policies is a breeze, with credits, debits and other allocation factors defined to fit clients' unique needs

Cancellation/reinstatement management. The system identifies and processes policies with delinquent payments or those that have not met obligations such as payroll reporting

These features and more add up to ultimate usability. Workers' CompXPress provides outstanding flexibility for rating, billing, payments and tracking at either the master policy or subsidiary levels

WORKERS' COMPXPRESS

Don't just take our word for it...

"At Victory Insurance, we invest significantly in our technology strategy to continuously improve policyholder services, such as offering self-service web portals and effective loss prevention tools, while ensuring we utilize market leading cyber security solutions. Insurity's solution not only enables us to improve communication and interactions with our customers, but also ensures that we continue to run our business in the efficient and effective manner which has made us successful for years."

~Keith Brownfield, President of Victory Insurance

Insurity's software solutions are also available as part of a comprehensive suite:

Boost your efficiency with an integrated workers' compensation policy, billing and claims system

Streamline decision-making with advanced analytics and predictive modeling

Leverage workers' compensation knowledge with Insurity's 30+ years of domain expertise and experience in deploying insurance technology solutions

Provide outstanding service with integrated self-service web portals for agents and policyholders

Lower costs and increase security with Insurity's state-of-the-art cloud hosting model
